# **-C- THE DIFFERENCE - WITH CHIANINA & CHIANGUS BULLS**

Welcome to the 2022 American Chianina Association Sire Directory!

This directory is filled with some of the breed leading sires that the members of the American Chianina Association have to offer! In the pages to follow you will find bulls that will sire calves that will not only calve easy, but will grow well. If the show ring is your focus, there are bulls that will sire your next champion as well. The options are endless.

The Chianina breed offers so much to the industry with its versatility from pasture to plate to the show ring...we are very diversified! I encourage you to contact the breeders of these bulls to discuss how these sires can help your program and give the shot of Chi genetics your cows need! Please feel free to contact the Association staff as well with any questions. We look forward to talking with you about what the Chianina breed has to offer you and how you can -C- The Difference.

Sincerely,

*Dustin*

Woodhaven Ms Advantage 33W

JDSF/WVW DRIVER 118D PCA is a herdsire that is 27.51% Chi and producing calves that are functional from the show ring to the pasture. He is sired by the Talmo Ranch sire TR ABOVE PCA with his Dam being JDSF DIVA 304Y. His dam was named calf champion at the 2011 NAILE. She is an RDD CROWN ROYAL daughter and out of our donor, WOODHAVEN MS ADVANTAGE 33W. His Granddam is still producing top calves in our herd at 13 yrs of age. With only two calf crops he has produced the Grand Champion Chiangus Female at the 2021 Jr. Nationals, Calf Champion at the 2021 Jr. Nationals and the Jr. and Open Senior Calf Champion at the 2021 NAILE. His progeny also won Grand Champion Chi at the Georgia National Fair in 2021 and Reserve AOB at the South Carolina Jr. Beef Roundup. We have kept every female that we could to put back into the herd as we feel these are the kind of females that will raise calves to compete in the show ring and produce functional herdsires to put pounds on calves.

Clockwork was the 2016 National Champion Chiangus Bull at the NAILE and is our most consistent sire of winning Chiangus bulls and females. His daughters have averaged almost \$7,000 in our sales and have won banners at every major Chiangus show in the country. His sons, HIGG Second Helping 77E and HIGG Franchise 868F, were named champions at NAILE and Ft Worth. He comes from the most consistent flush in our program's history. Use him to inject presence, improve structure and increase quality.

Second Helping was the 2017 National Champion Chiangus Bull and is a product of years of mating proven predictable genetics. His dam is a picture perfect Remedy daughter out of an Eagle Scout daughter that originated in the Horsley-Cardinal program. In his first calf crop with extremely limited use, his daughters averaged \$11,000. He is proving to be a power bull that still maintains the look and structural correctness we demand while offering an increased Chianina percentage.

TR Ms Magic Lace E758N

GOP Fair Play 809F ICA (13.97%) is sired by Colburn Primo and out of a royally bred Talmo cow (Trail Blazer x Flash Magic x Eagle Scout / HXC Lace). "Fair Play"

combines structural correctness, soundness and mobility, style, balance, athleticism and "look", with a tremendous amount of muscle and red meat and the added bonus of being a calving ease sire. "Fair Play" calves arrive unassisted out of heifers, averaging 65 pounds. A full brother to Kennedy's "GOP Greta Garbo 910C" (the 2020 National Grand Champion Chiangus Female) and a 3/4 brother to "EVNS/TR Enchanted 717E" (the 2019 Chiangus Show Heifer of the Year), this family of cattle has a proven track record in the ring with dispositions that are beyond compare. He posts an impressive EPD profile. Use "Fair Play" to add muscle, improve temperament, sire show cattle, raise the percentage of Chianina blood and as a calving ease sire.

DAJS Black Out 93G is the most dominate show bull the Chiangus breed has seen in recent years. Crowned as the National Champion Bull at back-to-back North American's, he is well on his way to becoming a two-time Chiangus Show Bull of the Year. His 2021 calf crop is impressive, and he passed along the same power, stoutness and length of body that he possesses. If you're looking to add foot size, bone, depth of body and width of skeleton, all while maintaining structural integrity, look no further! Black Out's breeding potential is truly unlimited as he is a complete outcross from so many of the current Chiangus pedigrees.

Colton Prescott – 260-729-2713

We are super excited about what this young sire brings to the breed! His second round of offspring will be hitting the ground anytime and we could not be anymore anxious to see what they will turn out like. Black Frost is a total outcross to any of the Who Da Man daughters or granddaughters which seem to be so popular in our breed today. This versatile young sire can be used in so many different ways – breed him to a Chiangus, half-blood Limmy or a half-blood Gelbvieh. The result of such matings would include Chiangus, Lim-Flex and Balancer cattle. He works very well bred to Angus-sired females. Black Frost will add skeletal width, improve structural integrity and overall look and make them stouter featured. On his first crop we had calves range from 55 to 70 lbs and they all came unassisted. We are not calling him a 100% heifer bull but we have had very nice birth weights to this point. We are excited to see this young sire make an impact in your program as well as ours.
